- **CASE MANAGEMENT.**
- **WORKPLACE RISK MITIGATION DESIGN AND ADVICE.**

WHAT ABOUT RATS?

RATS OR RAPID ANTIGEN TESTS CAN DETECT WHETHER PROTEINS RELATED TO COVID-19 ARE PRESENT IN YOUR BODY.

RATS CAN SOMETIMES DETECT COVID-19 BEFORE YOU DEVELOP SYMPTOMS. THEY'RE NOT AS ACCURATE IF YOU DON'T HAVE SYMPTOMS AND CAN PRODUCE EITHER FALSE NEGATIVE OR FALSE POSITIVE RESULTS.

RATS ARE QUICK — RETURNING A RESULT WITHIN 10 TO 20 MINUTES. YOU CAN DO THE TEST AT HOME .

ONLY USE RATS THAT ARE APPROVED BY THE AUSTRALIAN TGA.

NOT ALL RATS CAN DETECT ALL STRAINS OF COVID-19.
